

## □ Hardware Recommendations - Workstation Specifications

*Last revision to this list: 12/14/2009*

### □ Computer:

- **Processor:** P4 3.0 GHz or better.

! ***Note:** Intel Celeron Processors are **not** recommended.*

- **Memory:** 2 GB RAM or more.
- **Video:** ActiveX 9.0 compliant 256 MB on card memory (ATI or NVidia).
- **Hard Drive:** 80 GB or better.

### □ Operating System:

- Windows XP 32 bit Edition with Service Pack 3 is the minimum required
- Windows Vista 32 bit and 64 bit Edition is supported
- Windows 7 32 bit and 64 bit Edition is recommended

! ***Note:** Windows 95/98/ME and 2000 are **not** recommended for systems running HomeBASE with VIEW.*

### □ Monitors:

- 19" or greater screen size. Dual monitors are recommended when using HomeBASE with VIEW.

! ***Note:** Monitor(s) should be capable of 1280x960 resolution or better.*

### □ Mouse / Keyboard:

- 4 button Windows supported mouse with wheel is recommended, 3 button is required.

! ***Note:** Microsoft or Logitech are safe brands.*

### □ Printer:

- HP brand/emulation has proven to be the most reliable, but others should work too.

! ***Note:** Printer must be Microsoft Windows® Hardware Quality Labs Certified.*

### □ Internet Access / ISP:

- If you plan to connect to the internet, payment of separate fees to service providers may be required. DSL / Cable or Corporate T-x connection is recommended.

! ***Note:** 56K internal or external Modems are slow and antiquated, but may still be used.*

### □ CD-Rom/ DVD Rom:

- DVD Roms are now required for HomeBASE installs.

*These recommended computer hardware specifications do not necessarily mean the VIEW software does not work with lesser hardware; however, software performance may be affected.*
